

# Armaments Funding in Africa

## Africa government funding- armaments

Weaver Capital consulted on behalf of an armaments supplier to an African government, acquiring helicopters, for peace keeping and other operations, such as monitoring and securing fly over of commercial flight as outlined under global aviation laws and monitoring agencies

The solution included obtaining funding for the systems provided, as well as mitigating the risks perceived by off shore funders, as well as their reluctance to finance any items that might be construed as offensive armament.

## The Solution

Weaver Capital provided a solution, targeting funding based on the defensive, peace keeping and monitoring nature of the systems. This was further enhanced by securing:

1. Sovereign Guarantees
2. PRI and ECA covers

All other aspects are under our non disclosure agreements and will remain undisclosed.
