

Gauteng Asset finance

Asset Finance - Gauteng

Government

Weaver Capital acted on behalf of Safika to arrange funding to the Gauteng government of Kyocera printers and copiers that ultimately deployed devices to the value of some R 70 million

The equipment was financed on a rental basis, paid monthly over a 36 month basis.

Government funding is becoming increasingly more complex globally - and Weaver Capital continue to offer unique solutions in this arena.

The result

Safika was able to reply on the basis the government required, and assure monthly service contracts that ensured attractive recurring revenue streams.

Unique solution

The government would only sign government orders without any finance agreements, only supported through the tender agreement with Safika.

Lenders - willing to work on this basis was negotiated and deployed as part of the solution.
