

Equipment And parts funding

Equipment and Parts supplier Bridge finance

Weaver Capital consulted to an equipment and parts supplier to the mining industry across Africa, who required additional resources for the management of Cashflows to enable execution of customer orders across the continent.

Our solution included :

1. Arrangement of R 750,000 in bridge funding within 48 hours
2. Consolidation of other balance sheet items in a balance sheet re structure which is a active project.
3. Creation of an expansion capital plan to enable local manufacturing and logistics

management in a currently active broader plan to manage resources across Africa.

The Result

The solution ensured enhanced cashflow, as well as improved business opportunities both in South Africa and across the continent - allowing attractive growth prospects for the company.

It also enabled faster customer acquisition by making funding available against order execution to accelerate deliveries.
