Minimum Requirements

Weaver Capital Buyer qualification

The South African market for Chromium and related ferro metals is robust and fast growing.

This has attracted many opportunistic players, often masquerading as buyers to gain access to product sources. Weaver Capital source large quantities of Chromium and related products through our large and long established Mining partner network, and to eliminate dealing with these types of organizations - have set the following as parameters for Qualifying buyers:

- ▶ Listed and established mining resource companies
- ▶ Large traders with international users, that maintain websites and can provide extensive company overviews, similar to us

- ▶ Companies with the resources to issue LC and participate in our secure trust transactions and can provide certified proof of this capability
- ▶ Clear Proof of Funds before negotiations commence
- ▶ Traders dealing on behalf of international users or resource companies that can prove this relationship, after signature of our NDNCA
