

G- SOC

Process and ISO

Process and ISO consulting

The G-SOC is a secure operations Centre responsible for monitoring:

1. More than 33 000 seats
2. Over 600 sites with more than 400 data sources on a 24/7 basis

The Centre has more than 50 staff, and required ISO certification as part of its service offering to corporate and government departments to prove international security compliance and standards.

Weaver Capital consulted on process, created process maps and negotiated full ISO 27001 compliance - thus ensuring complete compliance to global accepted standards in its process and compliance measures.

The outcome

ISO compliance made GSOC the first secure operations Centre in SA to achieve this certification, and created many new corporate and tender opportunities, ensured more effective control, as well as compliance management for its clients.
