Process acceleration

Process Acceleration - student Loans

In the competitive world of loan application-speed of process can mean the difference between success and failure. Weaver Capital Consulted to EduLoan on the acceleration of this critical process. The solution included:

1. Automated capturing of application forms
2. Integration of the data with an automated workflow solution for approvals
3. Dynamic verification of data to credit bureau and bank systems
4. Automatic approval and decline in pre-defined instances
5. Automated communications.

The Result

Weaver Capital was able to reduce the application process from days to mere minutes in the deployment of the automated solution.

Dynamic character recognition and automated workflows increased processing time and resulted in increased through put at Lowe personnel cost - resulting in higher revenues and profits.
