# SME BRIDGE FINANCE

## Results to Business Challenges

We understand that SME companies often need funding to ensure consistent customer activity and performance on orders - which can have a dramatic impact on cash flows.

Our solutions are structured to meet this requirements.

Either you need bridging to finance customer orders regularly - while you wait for payments in 30 days.

Or you have a new project on orders issued from substantial companies,

Funding against  
business drivers  
rather than high  
end securities such  
as property and  
other assets

## Simple business bridge

When you simply need bridging finance against your client base to enable order flow, while you receive payments 30 days later - this makes real business sense.

The Facility will deliver between R 250,000 and R1 million.

We require :

1. Company must be more than a year old
2. Turnover must be R 500,000 or more
3. Annual financial statements
4. ID of directors and registration documents
5. Three months bank statement

Decisions are communicated mostly in 48 hours

## Project Bridge

Similar to above except, we will need :

1. Copies of Orders received
2. Profile on the company issuing the orders
3. Contract with this company and yours
4. We can consider start ups - if contract values justify this

Values offered is between R 1 - 5 million,

Chris Scholtz
